Re: CC Docket No. 94-102 – In the Matter of Revision of the Commission's Rules to
Ensure compatibility with Enhanced 911 Emergency Calling Systems

Dear Mr. Sugrue:

In accordance with your letter of July 29, 2002, Verizon respectfully submits the attached report regarding the status of its local network readiness to support wireless E911 implementation. Verizon currently supports 2000 PSAPs nationwide. With the limited exception of 11 grandfathered systems that cannot be upgraded, all other Verizon-operated databases have been upgraded and all interfaces are ready now for testing and launch of E911 Phase II service. Verizon is ready to handle all PSAP and wireless carrier request for the service.

Please call me if you have any questions regarding this report.

Sincerely,

Attachments

**Information Request
Verizon Communications, Inc.
CC Docket 94-102
In the Matter of Revision of the
Commission's Rules to Ensure Compatibility
with Enhanced 911 Emergency Calling Systems**
